PRICES LOWER THAN EVER BEFORE ANYWHERE.

POINTS AND SUGGESTIONS.

WE have no agents, and sell trees at retail for wholesale prices. Order direct of us and save one-half or more of the price you must pay to agents.

We call especial attention to our large and first-class stock of prune trees.

We take all possible pains to have all trees

true to name, and hold ourselves responsible for all errors to the amount paid for the trees, but no more.

We have in our nurseries, of our own growth, all trees offered in this catalogue, and guarantee all stock to be free of insect pests.

Select your richest and best drained soil for the orchard. Ground that will raise good potatoes will grow fruit trees. When the trees are received from the nursery bury the roots deeply and pack the earth firmly about them.

Plant about an inch deeper than the trees stood in the nursery. Dig the holes large enough to give the roots ample room, but no more; cut off the bruised ends of the roots with a very sharp knife from the under side; set the tree perfectly straight or leaning in the direction of prevailing winds. Work rich, mellow soil among the roots, which should point downward, and tramp it solidly the size of the hole and cover with a couple of inches of loose soil. Cut the brances of all trees back at least one-half when planting.

For prunes, peaches, plums and pears we recommend planting one rod apart each way. Apples and cherries may be planted twenty or twenty-four feet. We advise low heading for all trees.

Our terms are CASH, or satisfactory security with the order where credit is given.

Please write your order with address and shipping directions on separate sheets from the letter. Prices are for trees packed and on cars at Canby, on the O. & C. Ry., about twenty-two miles south of Portland.

VARIETIES.

Prunes.— Italian, Petite Prune d'Agen or French Prune, Silver, Grosse d'Agen, and Golden.

We call especial attention to our Golden prune, which was originated by our senior partner, Seth Lewelling. This prune when dried brings us one-fourth higher price in the market than any other, and we recommend it to those growing for market, especially in California. It is unsurpassed as a canning fruit. Hon. W. A. Taylor, U. S. Assistant Pomologist, writes of the Golden: "This fruit was superior

to any dried plums or prunes I have tested, even to those especially prepared for desert use."

Plums.—Peach Plum, Kelsey, Ogon, Washington, Green Gage, Bradshaw, Yellow Egg, Columbia, Evan's Jumbo, Botan, and Coe's Golden Drop.

Apricots.—Moorpark.

Summer Apples.—Red Astrachan, Early Harvest, Red June, Duchess of Oldenberg, Tetofsky.

Fall Apples.—Fameuse, Twenty Ounce, King of Tompkins County, Johnathan, Fall Pippin, Tallman Sweet, Rome Beauty, Stump, Rambo, Pennsylvania Red Streak, Wagoner, Haas, Wallbridge.

Winter Apples.—Yellow Newtown Pippin, White Winter Pearmain, Grimes' Golden Pippin, Swaar, Stark, Wine Sap, Baldwin, Yellow Bellflower, Ben Davis, Roman Stem, Milam, Missouri Pippin, Roxbury Russet, Winter Russet, Wealthy, Golden Russet, Lawver, Perry Russet, Utter's Large Red, Red Cheek Pippin, Maiden's Blush, Pewaukee.

Crab Apples.—Alaska, Transcendant, Hyslop.

Summer Pears.—Bartlett, Clapp's Favorite, Seckel.

Fall Pears.—Dutchess d'Angouleme, Beurre d'Anjou, Keiffer's Hybrid, Flemish Beauty, Sheldon.

Winter Pears.—Winter Nellis.
